

**THE BREWSKEY™**  
UNLOCK THE FLAVOR OF YOUR BEER™

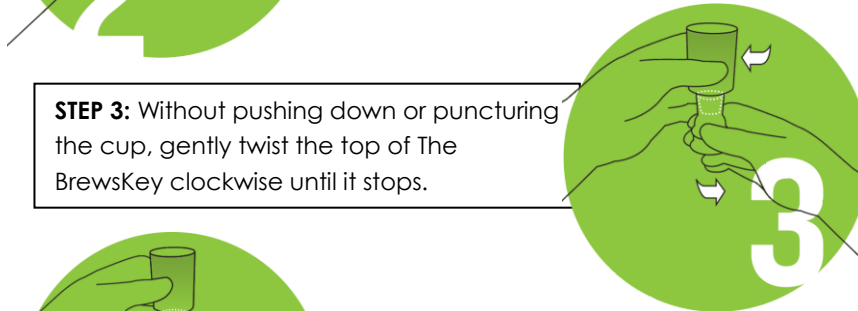

## HOW IT WORKS

There are two components to The BrewsKey™: the actual BrewsKey™ accessory and a reload cup. The reload cup is a “cup-within-a-cup”. The inner cup holds sea salt; the outer cup: 100% natural, dehydrated lime. A spike within The BrewsKey actuator pierces the cup and evenly distributes the lime and salt into the beer bottle.

**STEP 1:** Take a swig of your beer ... a very important initial step to avoid foaming-over. Lightly twist the top part of The BrewsKey™ counter-clockwise and set the top portion to the side.

**STEP 2:** Push flavor cup down into the neck of The BrewsKey until it stops.

**STEP 3:** Without pushing down or puncturing the cup, gently twist the top of The BrewsKey clockwise until it stops.

**STEP 4:** Place The BrewsKey on the top of your beer bottle. Hold The BrewsKey and the beer with the same hand making sure fingers are below the top ridge.

**STEP 5:** With The BrewsKey secured, slam the top down with the palm of your hand. Then plunge the top up & down. Enjoy your perfectly dressed Mexican style cerveza.
